

Candidate contributions

proposed problems, reduction rules, PRs

Issue review (Stage 2)

rejects: vague specs, undefined symbols, unsupported claims

Compile-time type checks

rejects: API misuse, type errors (Rust compiler)

Unit tests (CI)

rejects: evaluation and serialization bugs

Round-trip tests this work

rejects: drift between contributor's example and generated artifact

Agentic feature tests (Stage 4)

rejects: usability gaps and semantic errors at the CLI surface

Manual verification (Stage 6)

rejects: subtle misinterpretations of the original math

Verified contribution
