

Candidate contribution

1 Issue review

rejects vague specs, unsupported claims

2 Compile-time type checks

rejects API misuse, type errors

3 Unit tests

rejects evaluation and serialization bugs

4 Round-trip tests ★ ours

rejects drift between contributor's intent and the artifact

5 Agentic feature tests ★ ours

rejects usability and semantic errors at the CLI surface

6 Manual verification

rejects subtle misinterpretations of the original math

Verified library entry
